Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13 and 17-24, drawn to a method of determining distance to an echo point, classified in class 370, subclass 286, as shown in Fig. 1B.

II. Claims 14-16, drawn to a DSL Access Multiplexor (DSLAM), classified in class 370, subclass 395.5, subclass 420, as shown in Fig. 1A.

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a method of performing a single determination of distance to an echo point in a wire-line medium. See MPEP § 806.05(d).

In the instant case, the different subcombinations are distinct because of the following:

a. Invention I is directed towards a method of performing a single determination of distance to an echo point in a wire-line medium, the method comprising: transmitting a first sequence of bits on said wire-line medium; monitoring the wire-line medium to determining reception of said first sequence of bits as an echo from said echo pint; and computing a distance to said echo point.

b. Invention II is directed towards a DSL Access Multiplexor (DSLAM) comprising: a switch fabric; and a plurality of line cards coupled to the switch.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and subject matter, the search required for each invention is not required for the other. Therefore, restriction for examination purposes as indicated above is proper. See MPEP 806.05 (d).

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1,48(b) and by the fee required under 37 CFR 1.17(i).

6. A shortened statutory period for response to this office action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of this ap[placation (see 35 U.S.C. 133 and MPEP 710.02, 710.02(b)).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramnandan Singh whose telephone number is (571) 272-7529. The examiner can normally be reached on M-TH (8:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang can be reached on 571-272-7547. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
